Docket No. CP06-365-000
Docket Nos. CP06-366-000
CP01-376-000
CP06-377-000

NOTICE OF INTERVENTION

The Washington Utilities and Transportation Commission (WUTC), being an interested commission of the State of Washington, having jurisdiction to regulate gas and oil pipelines operating within the State of Washington, and having authority as an interstate agent to inspect interstate pipelines under a U.S. Department of Transportation Gas Pipeline Safety Program Interstate Pipeline Transportation Agreement signed November 26, 2002, hereby gives notice of its intervention in the above-entitled docket pursuant to Rule 214 of the Federal Energy Regulatory Commission's Rules of Practice and Procedure (18 C.F.R. § 385.214).

The WUTC is primarily concerned with the safety aspects of this filing, including (but not limited to) ensuring that the proposed natural gas pipeline downstream of the proposed LNG storage and vaporization facility is designed and constructed to meet or exceed applicable standards, and that any deviations from these standards be corrected before the line is placed in service. Moreover, the WUTC seeks to ensure that regulatory

oversight during the construction phase is sufficient to assure compliance with these standards. Because pipeline safety jurisdiction under the U.S. Department of Transportation and under the WUTC does not take effect until the pipeline is operating, regulatory oversight of pipeline construction needs to be accomplished under FERC's certificate authority. The WUTC is also concerned with the safety aspects related to the siting of the pipeline regarding waterway crossings, areas prone to earth movement and other natural and man-made features that can increase the safety risks or consequences of a pipeline incident.

The following person should be included on the official service list, and all correspondence and communications concerning these proceedings should be addressed to:

Alan E. Rathbun, Pipeline Safety Manager
